

Waqt — Install & use guide

Install the Android APK

- Open the ShafiAppCo Downloads page on your phone
- Tap Download Waqt APK and install
- Allow notifications when Waqt asks
- If Android asks for exact alarms / Alarms & reminders, allow that too

Lock screen Adhan

Turn on Play Adhan at prayer time in Settings. Waqt schedules prayer alarms on the phone. When a prayer begins, Adhan plays through a foreground service with a lock-screen notification and Stop control, even if the screen is locked or the app is in the background.

Set your location

Search for your city or use GPS. Prayer times and Qibla use that place and its timezone.

Web

Browser use does not keep Adhan running on the lock screen. Use the Android APK for lock-screen Adhan.
